Excess of imports over ex sorts......\$1,160.042 The bulk of imports last week was in dry goods, while the bulk of exports was in domestic marchandise. More than one half of the value of merchandise shipped from this port last week was in breadstaffs. The outward movement in cotton has for some time past been exceed-ingly limited, and but for the demand for flour and corn existing in all parts of Europe, our export trade will be con posec principally of the precious metals.

The general features of the traffic in dry goods enring the past week are esseptially the same as and reverty nine thousand fire hundred and fifty sight those referred to in our former notice. Buyers have deliate, vir. from the joint companies, since the year learn recently more active in rearrhing for desirable 

thing like spirit, negotiations for the purchase of such. On this account, the actual transactions which occur daily are hardly worthy of remark, as they do not afford a criterion of the real position and prospects of the spring business, which, in previous years, was generally quite vigorous about this time, but which is now ex-

ture. Satisets are depressed and languid. Shawis and tweeds remain about the same.
